1 Introduction

1.1 Purpose

透過訓練一個有許多人物大頭照圖片的資料集，來達成能夠有效分辨出輸入圖像的人物年齡

專案目標:

- 藉由UI介面選擇一張人物大頭照圖，經過系統判別該照片中人物年齡約是多少。
- 盡可能地增加圖片分析的準確度
- 能夠辨別出使用者輸入的圖片是否有人臉

1.2 Intended Audience and Reading Suggestions

此系統為人臉年齡辨識，本規格書提供專案開發人員做為參考，包括專案概述、功能說明、UI操作及環境架設。

1.3 Project Scope

- 能讓使用者操作選擇圖片的UI介面
- 能輸入圖片並分析年齡進行分類的training
- 能分析輸入的圖片是否含有人臉
- 建立UI介面的防呆機制
- 可以用UI一次顯示多張圖片識別的結果

此系統包含了能選擇圖片的UI介面以及後端處理分析人物年紀的程式，再傳回結果至UI顯示。

2 Overall Description

2.1 Product Perspective

本系統分為兩個部分，分別為UI前端，和人臉圖片辨識系統，如下圖所示：
畫圖

2.2 Product Functions

UI前端會送出使用者所選擇圖片之路徑，傳至後端人臉辨識系統，經過人臉辨識模組後傳回圖片以及該圖片人物的年齡。流程圖如下：
畫圖

2.3 User Classes and Characteristics

本系統只為人臉辨識中的其中一環，提供給其他整合人臉辨識系統的專案其中一項功能，同時，也提供操作的介面讓專案測試人員能選擇圖片去測試系統人臉辨識完成度。
畫圖

2.4 Operating Environment

- Windows 10 作業系統
- Python 3.6
- TensorFlow Background

2.5 Design and Implementation Constraints

由於Project製作時程不夠長，加上目前所學的技術限制，會有以下問題不支援

- 圖片大小限制在224x224
- 準確率沒辦法到達100%
- 不會判定該圖片是不是人物圖像
- 只能接受jpg圖檔

2.6 Assumptions and Dependencies

額外的安裝包	
datetime	Paul Robinson
numpy	Lucas Radebe
sklearn.metrics.accuracy_score	123
keras	123
csv	123
cv2	123
PIL.Image	123
PIL.ImageTk	123
tkinter	123

3 External Interface Requirements

3.1 User Interfaces

1. 主介面如 Fig.3.1 所示，包含封面頁，以及可以選擇測試檔案的按鈕

Figure 3.1: UI Home Page.

2. 按下選擇檔案按鈕則開啓一個資料夾視窗，只可以選擇jpg檔案，如 Fig.3.2 所示

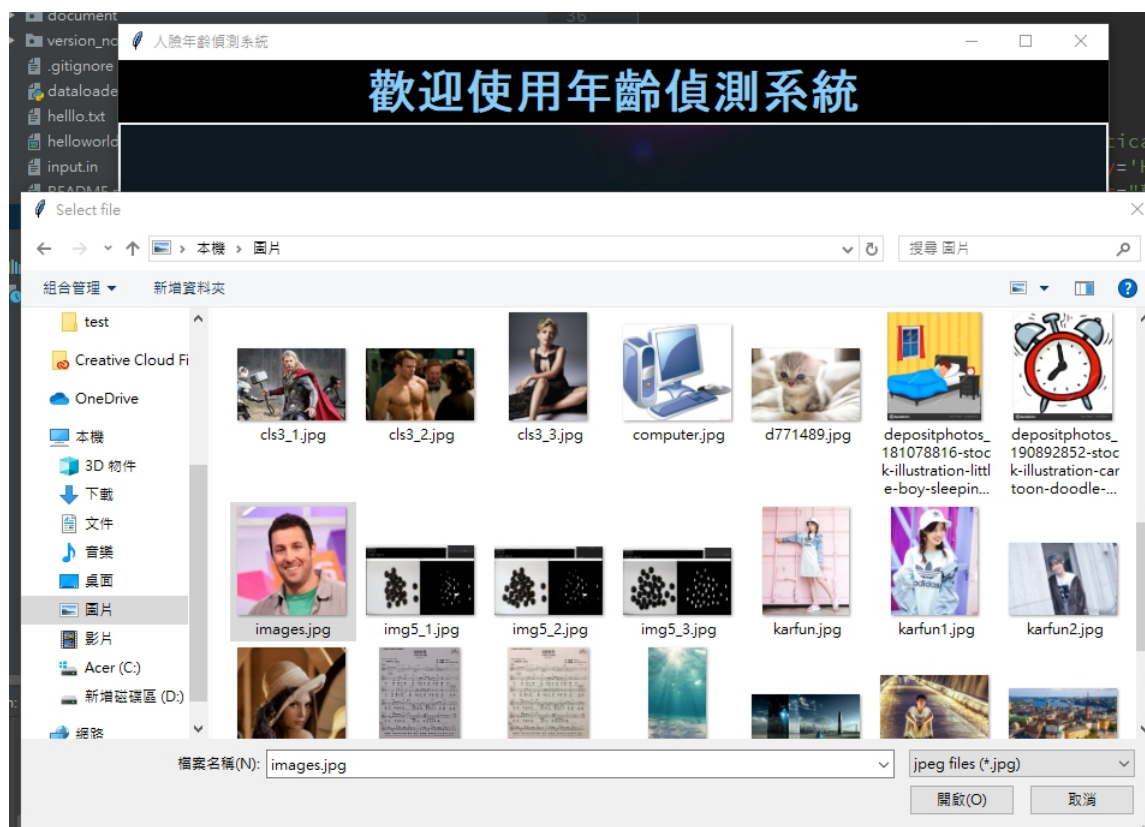

Figure 3.2: UI Select File Window.

3. 選擇了圖片後按下開啓，等待系統回應幾秒鐘會回傳該圖片以及判斷的年齡區間，以及左下角有離開程式的按鈕，右下角則有能回主頁面再重新選擇一張圖片進行測試的按鈕，如 Fig.3.3 所示

Figure 3.3: UI Response.

3.2 Hardware Interfaces

1. CPU: intel i5-6200U5
2. Memory: 8GB

3.3 Software Interfaces

1. Windows 10 64 bit
2. Python 3.6
3. TensorFlow Background
4. Keras API

4 System Features

<This template illustrates organizing the functional requirements for the product by system features, the major services provided by the product. You may prefer to organize this section by use case, mode of operation, user class, object class, functional hierarchy, or combinations of these, whatever makes the most logical sense for your product.>

4.1 System Feature 1

<Don't really say "System Feature 1." State the feature name in just a few words.>

4.1.1 Description and Priority

<Provide a short description of the feature and indicate whether it is of High, Medium, or Low priority. You could also include specific priority component ratings, such as benefit, penalty, cost, and risk (each rated on a relative scale from a low of 1 to a high of 9).>

4.1.2 Stimulus/Response Sequences

<List the sequences of user actions and system responses that stimulate the behavior defined for this feature. These will correspond to the dialog elements associated with use cases.>

4.1.3 Functional Requirements

<Itemize the detailed functional requirements associated with this feature. These are the software capabilities that must be present in order for the user to carry out the services provided by the feature, or to execute the use case. Include how the product should respond to anticipated error conditions or invalid inputs. Requirements should be concise, complete, unambiguous, verifiable, and necessary. Use "TBD" as a placeholder to indicate when necessary information is not yet available.>

<Each requirement should be uniquely identified with a sequence number or a meaningful tag of some kind.>

REQ-1: REQ-2:

4.2 System Feature 2 (and so on)

5 Other Nonfunctional Requirements

5.1 Performance Requirements

<If there are performance requirements for the product under various circumstances, state them here and explain their rationale, to help the developers understand the intent and make suitable design choices. Specify the timing relationships for real time systems. Make such requirements as specific as possible. You may need to state performance requirements for individual functional requirements or features.>

5.2 Safety Requirements

<Specify those requirements that are concerned with possible loss, damage, or harm that could result from the use of the product. Define any safeguards or actions that must be taken, as well as actions that must be prevented. Refer to any external policies or regulations that state safety issues that affect the product's design or use. Define any safety certifications that must be satisfied.>

5.3 Security Requirements

<Specify any requirements regarding security or privacy issues surrounding use of the product or protection of the data used or created by the product. Define any user identity authentication requirements. Refer to any external policies or regulations containing security issues that affect the product. Define any security or privacy certifications that must be satisfied.>
